Professional Summary

Motivated Computer Science Engineering student with a robust foundation in full-stack development, mobile application design, and emerging technologies. Demonstrated expertise in building scalable Flutter applications and proficiency in modern development practices. Passionate about leveraging AI, machine learning, and cloud technologies to create innovative software solutions that drive business value and enhance user experiences.

Education

Vishwakarma University

Pune, Maharashtra, India

Bachelor of Technology in Computer Science & Engineering

CGPA : 8.63

- Focus Areas: Object Oriented Programming, Data Structures & Algorithms, Computer Networks, Database Management, Data Science, AI & Machine Learning

Technical Skills

Programming Languages: C, C++, Python, JavaScript, Dart

Frontend Development: HTML5, CSS3, React+JavaScript (ES6+), Flutter, Responsive Design

Mobile Development: Flutter, Dart, State Management, Cross-Platform Development

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Design Patterns, Exception Handling, File I/O Operations

Cloud & DevOps: Google Cloud Platform (GCP), Git, GitHub, Linux/Unix, Cloud Storage, Pub/Sub

Data Analysis: Statistics, Data Visualization, Excel (Advanced Charts & Graphs)

APIs & Integration: RESTful APIs, Google Cloud APIs, Speech & Language Processing APIs

Projects

Flutter Music Streaming Application | *Dart, Flutter, State Management, API Integration*

Ongoing

- Architected and developed a feature-rich music streaming application with seamless user authentication, dynamic playlist management, and intelligent search functionality
- Engineered a persistent bottom music player with smooth transitions and background playback capabilities, ensuring uninterrupted user experience across all app screens
- Implemented clean architecture principles with separation of concerns, utilizing advanced state management patterns (Provider/Riverpod) for optimal performance and scalability
- Designed intuitive UI/UX following Material Design guidelines with custom animations and responsive layouts

E-Commerce Mobile Platform | *Flutter, Firebase, REST APIs, Admin Dashboard*

In Development

- Developing a comprehensive full-stack e-commerce solution with advanced product browsing, intelligent cart management, and secure order processing workflow
- Built a robust admin dashboard featuring real-time inventory management, order tracking, analytics, and customer management capabilities
- Emphasized modular architecture with reusable widgets, dependency injection, and clean code practices following SOLID principles
- Integrated secure payment gateway and implemented data persistence using local storage and cloud synchronization

Certifications & Learning

Google Cloud Platform - Advanced Badges

2024

- **Level 3: Generative AI** - Advanced generative AI concepts and applications
- **Develop Gen AI Apps with Gemini and Streamlit** - Building AI-powered applications
- **Prompt Design in Vertex AI** - Advanced prompt engineering for AI models
- **Analyze Speech and Language with Google APIs** - NLP and speech processing
- **Cloud Speech API: 3 Ways** - Speech-to-text implementation strategies

Google Cloud Platform - Infrastructure & Development

2024

- **Build a Website on Google Cloud** - Full-stack cloud deployment
- **App Engine: 3 Ways** - Scalable application deployment methods
- **Cloud Run Functions: 3 Ways** - Serverless function implementation
- **Set Up a Google Cloud Network** - Cloud networking and infrastructure
- **Monitoring in Google Cloud** - Application monitoring and observability

Google Cloud Platform - Data & Analytics	2024
• Get Started with Looker - Business intelligence and data visualization • Get Started with Dataplex - Data lake management and governance • Store, Process, and Manage Data on Google Cloud - Cloud data management	
LinkedIn Learning - Data Science	2024
• Introduction to Data Science - Foundational data science concepts and methodologies • Data Science Foundations: Fundamentals - Core principles of data science • Fundamentals of Data Transformation of Data Engineering - ETL and data pipeline design • Basics of Data Visualization Analysis - Visual analytics and storytelling with data	
Hackathon Achievement	2024
• National Level Hackathon - Organized by Innovation Foundation. Developed innovative solution under tight deadline	

Additional Information

Areas of Interest: Artificial Intelligence, Machine Learning, Data Science, Cloud Computing, Mobile Development
Soft Skills: Problem-Solving, Team Collaboration, Continuous Learning, Analytical Thinking, Project Management
